

JOSEPH PARK KASE

PROFILE

I want to be a part of a world that re-imagines media spaces based on the ways in which we relate to each other. Our future will be a world where technology will be paired with deep interpersonal connectivity, I plan to help create that world. In the past years of living a COVID life I have seen technology exponentially transform the workspace. I have strong interpersonal social skills paired with the technological background to process challenges into opportunities. I have always been drawn to experiences to improve not just myself but my community. I can take complex goals, situations and break them down to manageable learning points. I also take direction well and am incredibly self-motivated and an independent worker.
